## Ecosystem Evolution Checklist

### What do you Need?

Your organisation wants access to next-generation solutions that deliver value and return on your investment (ROI). However, managing your IT estate while ensuring your technology investments are relevant and up to date is a challenge.

It should be easy for your business to benefit from a flexible, cost-effective technology roadmap without unnecessary complexity.

### How Would You Define Your Technology Landscape Right Now?

- ☒ Have you recently undertaken a merger or acquisition process and want to consolidate your IT Estate?
- ☒ Is your IT department overstretched or struggling with resourcing and skills acquisition?
- ☒ Do you want to create a controlled and manageable IT estate that's easily managed and reduces disruption?
- ☒ Does your business need more time to manage every part of your IT estate?
- ☒ Do you need to achieve security and IT estate accreditation and require support achieving compliance?
- ☒ Do you require a clearly defined security roadmap built on a reliable security assessment that allows you to refine your estate, approaches and compliance?
- ☒ Do you need to optimise your existing investments to ensure they deliver the value you expected?
- ☒ Do you want access to a single pane of glass that's designed to handle every part of your ecosystem from licensing to managed security to backups?
- ☒ Do you want to work with one person – one central point of contact – who prioritises your business?

## Ecosystem Evolution FAQ

### **What is F.R.A.M.E?**

The Viadex F.R.A.M.E (Framework, Roadmap, Adoption, Measurable Value, and Enablement) methodology helps your organisation adopt and integrate a tailored portfolio of Microsoft products. F.R.A.M.E delivers scalable, flexible managed IT services that align with your strategy, optimise costs, and ensure future-ready infrastructure.

### **What IT Solutions Are You Using Now?**

It doesn't matter whether your business is embarking on a Microsoft journey for the first time or if you're looking to expand, enhance, or optimise your existing Microsoft product portfolio, F.R.A.M.E enables you to adopt the right solutions at the right time and only pay for what you use. An in-depth understanding of your existing environment allows us to create a portfolio that fits your needs.

### **What Are Your Long-term Cost And Operational Needs?**

Understanding your cost and operational requirements allows us to develop a cost-relevant roadmap that reduces pressure on your IT departments and minimises disruption.

**Do you require a total ecosystem overhaul, or would you need a phased approach?**

**F.R.A.M.E is designed to provide you with access to solutions that fit your business without the hefty upfront cost.**
